Heifers are guaranteed bred at time of purchase. Listed due dates are approximated via veterinary palpation combined with our breeding records. They are to be used as estimates of calving date and not as an implied calving date guarantee. The set of females had a breeding window from 12/7/25 through 4/16/26.

Bolded due date approximations are presumed to be AI sired calves. Oak Hollow Woodwright 2352 is cleanup sire to all heifers that do not calve AI.
